Day-24 Q-01 Tenth Line

Given a text file `file.txt`, print just the 10th line of the file.

Example:

Assume that `file.txt` has the following content:

```
Line 1
Line 2
Line 3
Line 4
Line 5
Line 6
Line 7
Line 8
Line 9
Line 10
```

Your script should output the tenth line, which is:

```
Line 10
```

Note:

1. If the file contains less than 10 lines, what should you output?
2. There's at least three different solutions. Try to explore all possibilities.

You may assume that the given Sudoku puzzle will have a single unique solution.

- The given board size is always `9x9`.
